TECH SKILLS

JAVASCRIPT / TYPESCRIPT

REACT

REACT NATIVE

REDUX / REDUX-SAGA

NODE.JS

AWS SERVERLESS

DYNAMODB

EXPRESS.JS

ALSO WORKED WITH

AngularJS, MongoDB, GraphQL, SignalR, D3, Azure, Firebase

LANGUAGES

ENGLISH ..... **FLUENT**

POLISH ..... **NATIVE**

JAPANESE ..... **BASIC**

HOBBY CORNER

JAPAN · TECH · CODING · TRAVELLING

PROFILE

8+ years / React 6+ years / React Native 3+ years / AWS 1+ year

Senior fullstack engineer with 8+ years building real-time web and mobile apps for retail, healthcare and vacation rentals. Strongest in React and TypeScript, also working with React Native and AWS serverless (Node.js). I deliver features on my own, including tests and performance, and mentor others.

Portfolio: https://portfolio-paweljedrasik.vercel.app/

WORK EXPERIENCE

SMOOBU, CRACOW (HYBRID)

SENIOR FULL-STACK DEVELOPER

MAY 2024 - PRESENT

React / TypeScript / MUI / TanStack Query / Jotai / Vitest / Cypress / Node.js / AWS Lambda / DynamoDB / SQS / PHP

- Own **Content Hub**, the React/TypeScript module where **25k users** manage their listings on Airbnb, Booking.com and Vrbo. Accounts average 10 properties and large clients have 100+. It covers details, policies, fees, tax, availability, photos, listing status, multilingual content and Airbnb compliance.
- Led the **Calendar load-time initiative** for slow connections and for accounts with 100+ properties. Added real-user monitoring in Datadog, loaded code asynchronously, cut startup requests, deferred third-party scripts and made server-side fixes in the PHP monolith. Real-user p75: app start **29% faster**, first paint **21% faster** and calendar usable **18% sooner**, on a legacy architecture.
- Took over a non-working Duda website-builder integration and **rebuilt it from scratch** as three AWS serverless services covering OAuth/SSO, site creation and property data sync. Later added multilingual sites, S3 translation offload and new endpoints.
- Built the new booking **Calendar**, with booking creation and cancellation, date blocking, price settings and price transfer, plus role-based navigation for assistant accounts.
- Migrated unit tests from Jest to Vitest and MSW, and maintain the SonarCloud quality gate. Added Snowplow tracking and Castle fraud protection to login, registration and password reset.
- Introduced AI-assisted workflows for the team, including Claude skills for our conventions, Jira release-notes automation and Localazy tooling.

WORKWAVE (ACQUIRED TEAM SOFTWARE), CRACOW (REMOTE)

SENIOR FRONTEND DEVELOPER

AUG 2022 - MAY 2024

TypeScript / React Native / React / Redux / Redux-saga / Firebase / Azure / CI/CD

- Lead frontend developer of **Portertrac**, a hospital task-management app for iOS and Android sold mainly to UK healthcare providers.
- Took the app **from zero to the stores**, covering Figma design, React Native code, the CI/CD pipeline and App Store and Google Play releases.
- Made all frontend design and architecture decisions. Mentored and supervised four other frontend developers in a team of 10.

TOOLBOX

CLOUD & BACKEND
AWS Lambda, SAM, API Gateway, Cognito, SQS, SNS, SES, S3, CloudFront, CloudWatch, X-Ray, REST, WebSockets

MOBILE
React Native, Expo, EAS, React Navigation, Reanimated, Firebase (FCM), Sentry, App Store and Google Play releases

UI & STATE
MUI, TanStack Query, Jotai, React Hook Form, Yup, Emotion, i18next, HTML5, CSS3/SCSS

TESTING & QUALITY
Vitest, Jest, Testing Library, MSW, Cypress, Puppeteer, SonarCloud

TOOLING
Git, GitHub Actions, Bitbucket Pipelines, Vite, Datadog RUM, Snowplow, Localazy, Figma, Claude Code

TEAM SOFTWARE, CRACOW
FRONTEND / SOFTWARE DEVELOPER APR 2018 - AUG 2022

JavaScript / AngularJS / React / React Native / Redux / Redux-saga / SignalR / Framer Motion / D3 / Jest / Puppeteer / TeamCity

- Joined as a junior and grew to mid-level on **RiskReady**, a loss-prevention app for retail stores with audits, incident reports and a form builder. Owned the **Watchlist** feature, used to track people wanted for theft and fraud and to create linked reports.
- Rewrote the 20-year-old Delphi desktop version of **Portertrac** as a **real-time React web app**. Owned the whole frontend while others handled the backend and database.
- Automated the regression testing that a single QA tester used to do by hand, covering the whole app with Jest and Puppeteer. A full run dropped from **1-2 days to 10 minutes** and bugs became rarer.

PERSONAL PROJECT

JOIYN, PERSONAL PROJECT
SOLO DEVELOPER JUN 2025 - PRESENT

React Native / TypeScript / TanStack Query / AWS SAM / Lambda / DynamoDB / Cognito / API Gateway / S3 / CloudFront / GitHub Actions

- Built and released **Joiyn** alone, a social app for finding and joining local events by interest and city, with chat between participants. It is live in the App Store and Google Play.
- Designed and run the whole stack alone. The React Native app talks to a serverless AWS backend with **65 Lambda functions**, 9 DynamoDB tables, Cognito sign-in with Google and Apple, WebSocket chat and media on S3 and CloudFront.
- Handle CI/CD, store releases, push notifications and monitoring with Sentry and CloudWatch.

EDUCATION

VEDIUS IT TRAINING CENTER, CRACOW
ECDL CERTIFICATE, WEB EDITING 2017

ZSP TEMPUS, INOWROCŁAW
TECHNICIAN DEGREE, IT 2010 - 2014
